

Guidelines to Authors

The Indian Journal of Chest Diseases and Allied Sciences considers for publication original articles dealing with respiratory and cardiovascular diseases and in the fields of anatomy, biochemistry, microbiology, mycology, pathology, pharmacology, physiology, ultra-structure and virology of respiratory, and cardiovascular systems. However, only papers that make a significant contribution to the existing state of knowledge in a particular field will be published. **The journal publishes original articles, review articles (invited), case reports, radiology forum, short communications and book reviews.**

Submission of Manuscripts. Manuscripts should be submitted in a CD in MS word (in addition to hard copies). Typescript including figures (in triplicate) should be sent to *The Editor-in-Chief, The Indian Journal of Chest Diseases and Allied Sciences, C/o Publication Division, V.P. Chest Institute, University of Delhi, Delhi-110 007, Post Box No. 2101.*

Articles can also be submitted on our e-mail at: publication@vpci.org.in and ijcdas@yahoo.co.in

Manuscripts should be submitted with the undertaking that they are not under consideration elsewhere and have not been reported earlier partly/ totally. Submission of a manuscript indicates tacit acknowledgement that all authors have made significant contributions to the study and have read and approved the contents. Any change in authorship following the original submission must be justified and agreed to in writing by the affected author(s). Manuscripts are acknowledged upon receipt.

When inquiring about a manuscript, please refer to the article accession number assigned to the manuscript by the Publication Office of the IJCDAS.

Manuscripts are evaluated critically by the Editorial Board with the help of Experts. Acceptance of manuscripts for publication is based on: (a) originality of contribution; (b) proper analysis of scientific data; (c) clarity of presentation; and (d) ethically acceptable design of the study. **All accepted manuscripts are subject to manuscript editing.** Only one copy of rejected manuscripts will be returned.

Preparation of Manuscript

Presentation of manuscripts should conform with the uniform requirements for manuscripts submitted to biomedical journals.

Authors are advised to see a recent issue of the Journal to get familiar with the format adopted on various elements of a paper. All the manuscripts should be submitted in the order set forth below. **Failure to follow these instructions may result in the manuscript being**

returned to the author(s) for revision before it will be reviewed.

General. Manuscripts must be typewritten, double-spaced with wide margin on A-4 size good quality bond paper. Each of these segments of the manuscript should begin on a new page: title page; abstract; introduction; references; legends; tables.

I. *Title Page.* This should be as concise and as informative as possible. List (i) title; (ii) the initials followed by the last name of each author; (iii) the name of the department(s) and institution(s) to which the work should be attributed; (iv) the name and address (**including e-mail**) of the author to whom queries, proofs and requests for reprints should be sent; and (v) a short running title (not exceeding 5 to 6 words).

II. *Abstract and Key Words.* The second page should carry a structured abstract of not more than 200 words with subheadings of Background and objectives, Methods, Results and Conclusions (unstructured abstract for case reports and radiology forum). It should be written for the readership of both clinicians and basic investigators and should state the hypothesis or central question of the study or investigation, the study subjects or experimental animals, observational and analytical methods, the main findings, and a final statement of the principal conclusions. **Three to six key words using, where possible terms of medical subjects headings list from Index Medicus.**

III. *Introduction.* It should commence on separate page and should briefly review the current state of knowledge strictly concerning the topic of the paper. It should also make a clear statement on the reasons for undertaking the study being reported and what it hoped to achieve. No mention should be made of the results obtained or conclusions drawn.

IV. *Material and Methods.* The material (patients, experimental animals, etc.) used for making observations must be described along with all other relevant information. The methods used in the study should be described, giving sufficient information to permit the work to be repeated. If a generally accepted technique has been used, only a reference to that is enough. If, however, such a technique has been modified by the workers, the manner in which this has been done should be clearly stated. **If statistical analysis of the data has been done, the methods used for analysis should be specified.**

V. *Results.* This section should not include materials suitable for inclusion in "Material and Methods" or "Discussion". The results should be presented in

logical sequence in the text, tables and illustrations. The data presented in the tables or figures should not be repeated in the text. Only important and significant observations should be included.

VI. *Discussion*. This should be limited to significance of results obtained and what can and what cannot be concluded and why. It should not be a repetition of the findings already given under 'Results'. Results should be discussed in the light of others' work in the field. Speculative and purely theoretical discussion to which results presented are not related will not be accepted.

VII. *Acknowledgements*. Acknowledgement should be brief and made specific for scientific/technical assistance and financial supports in the form of grants/drugs/equipment only and for not providing routine departmental facilities and for help in the preparation of manuscript (including typing/secretarial assistance).

VIII. *References*. References should be typed on a separate page after the text and these should be numbered consecutively in the order in which they are first mentioned in the text. Identify references in text, tables, and legends by Arabic numerals in parentheses. References cited only in tables or figure legends should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure. The titles of journals should be abbreviated according to the style used in *Index Medicus*. Consult the *List of Journals Indexed in Index Medicus*, published annually as a separate publication by the library and as a list in the January issue of *Index Medicus*. The list can also be obtained through the library's web site (<http://www.nlm.nih.gov>). Unpublished work should not be cited in references, but may be cited fully parenthetically within the text. List all the authors when there are six or fewer; but when there are seven or more, list the first six, then 'et al'. Examples of correct form of references are given here :

Articles in Journals

1. Standard journal article

Halpern SD, Ubel PA, Caplan AL. Solid-organ transplantation in HIV-infected patients. *N Engl J Med* 2002; 347: 284-7.

More than six authors:

Correctness of the reference list is the entire responsibility of the author (s).

Figures and Tables

Figures. Glossy print photographs (in triplicate) are required (usually 10 cm × 8 cm, 300 dpi in JPEG); good black and white contrast is essential for good reproduction. All illustrations must be numbered and cited in the text. Legends should be provided for each illustration, listed on a separate page. All lettering must be done professionally. Freehand or typed lettering is not acceptable. All figures should bear author's name, short title and an arrow indicating top of the figure in pencil on the back of the photographs.

Colour illustrations (300 dpi in JPEG) must be paid by the authors. Please ask rates/charges from the Publication Office of the IJCDAS.

Tables. Each table should be typed double-spaced on a separate sheet. They should have an underlined title followed by a legend, if any. Explanatory matter should be in a footnote, not in the title. The approximate position of each table in the text should be indicated in the margin of the manuscript.

Page Proofs and Reprints. A galley proof will be sent to the corresponding author which should be returned within four days. Corrections should be limited to printers errors only and no substantial additions/deletions should be made. No change in the names of authors (by way of additions and/or deletions) is permissible at the proof stage. *Twenty-five reprints of the article will be sent free of cost to the corresponding author.*

Papers which have been accepted/published become the property of the Indian Journal of Chest Diseases and Allied Sciences and permission to re-publish them must be obtained from the Editor.

CHECKLIST FOR SUBMISSION OF MANUSCRIPT

- Covering letter including copy-right release
- Three copies of typescript of the article on A-4 size paper
- Name and address of author responsible for correspondence about the manuscript, including highest degree and affiliations of each author.
- Abstract (upto 150 words) along with 3-6 key words
- Running title (5-6 words)
- Three glossy prints for each illustration (10 cm × 8 cm), appropriately labelled and each illustration is cited in the text. Submit the legends on a separate sheet in the manuscript.
- Check all references for accuracy and completeness. Put references in proper format in numerical order, making sure each is cited in the text.

The Indian Journal of Chest Diseases and Allied Sciences

*Publication Division
V.P. Chest Institute
University of Delhi
Delhi - 110 007*

UNDERTAKING BY AUTHORS

We, the undersigned, give an undertaking to the following effect with regard to our article entitled

submitted for publication in the *Indian Journal of Chest Diseases and Allied Sciences*:

1. The article mentioned above has not been published or submitted to or accepted for publication in any form, in any other journal;
2. We also vouchsafe that the authorship of this article will not be contested by anyone whose name(s) is/are not listed by use here; and
3. We also agree to the authorship of the article in following sequence:

Author's Name(s) (in sequence)	Signature of Author(s)
1. _____	_____
2. _____	_____
3. _____	_____
4. _____	_____
5. _____	_____
6. _____	_____
7. _____	_____
8. _____	_____

IMPORTANT

1. All the authors are required to sign this form independently in the sequence given above.
2. Each author should have generated at least a part of the intellectual content of the paper.
3. Each author should be able to defend publicly in the scientific community, that intellectual content of the paper for which he/she can take responsibility.
4. No addition/deletion/or any change in the sequence of the authorship will be permissible at a later stage.
